MOUNTED TRANSFER CARTS

B-PJTC

TRANSFERRING BATTERIES WITH SACKETT TRANSFER CARTS PROVIDES SAFE, EFFICIENT TRANSPORTATION OF YOUR FORK LIFT BATTERIES.

Whether you are utilizing opportunity charging, or conventional charging, these durable carts allow batteries to be removed quickly from forklifts for charging, servicing or watering. Available in several models and widths, Sackett has transfer cart solutions that save you time – and money, while keeping your business moving.

Model A-PJTC is the most economic alternative which allows manual battery extraction from fork lift and can be pushed into a fork lift manually. This model utilizes the pallet jack or fork lift to move the transfer cart. *Ideal usage: 1-5 battery changes per day*

Model B-PJTC is the safest and the best value – it has powered extraction of the battery from the forklift and uses the powered extraction arm to push the battery back into the forklift. *Ideal usage: 5-20 battery changes per day*

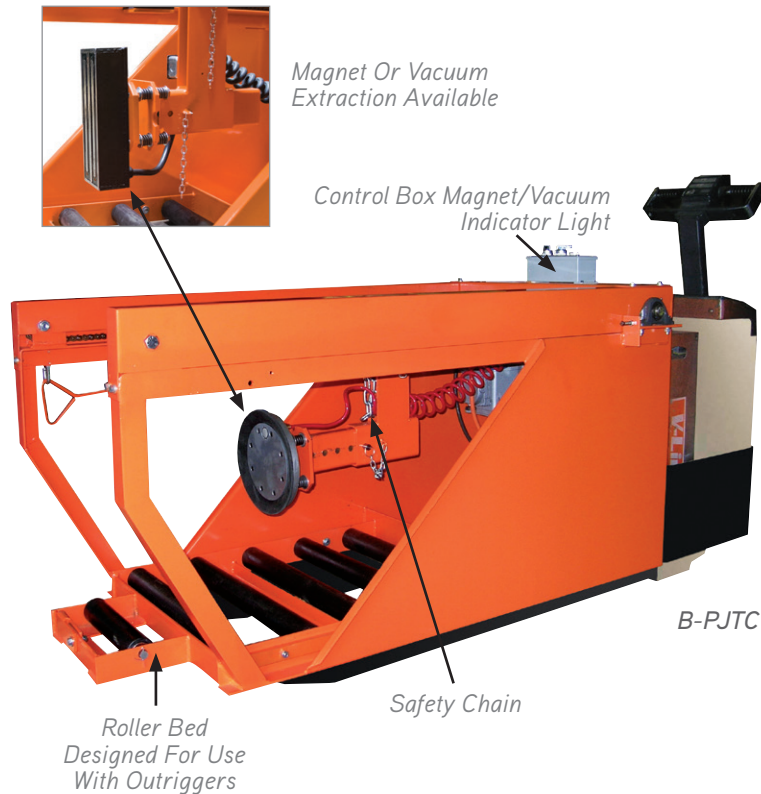

Model C-PJTC is the most versatile – it is powered like the B-PJTC but has a range of transfer heights from 6-1/2" to 26-1/2". *Ideal usage: 5-20 battery changes per day.*
